

Berkompas Steam Locomotive Collection

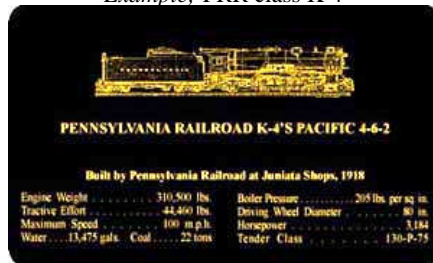

Unique engravings of meticulously detailed line-art steam locomotives drafted by well-known technical artist Bill Berkompas are presented on individually numbered plaque boards.

There are currently 23 locomotives in the Berkompas steam series. All the locomotives in the collection are scaled at 0.175" = 1' - 0".

Plaques are sawn and prepared in appropriate widths and lengths for attractive proportional presentation. A clear sealer and finish is applied to each board to enhance the natural color shadings and patina of the wood.

An engraved 3x5 gold lettered information card with the engine silhouette and description is included.

Example; PRR class K-4

*Railroad Tie board plaques have at least one spike hole or original manufacturers pre-drilled pilot hole.

A transparent label noting rail line tie source, species and preservative used is placed on back surface.
